

SMART CALL · ANDON 4.0 · WIRELESS

Cut machine downtime up to 50%.

Wireless ANDON + IoT analytics for manufacturers who can't afford unplanned downtime. Every call routes to the right tech in seconds. Every response is logged. No rewiring.

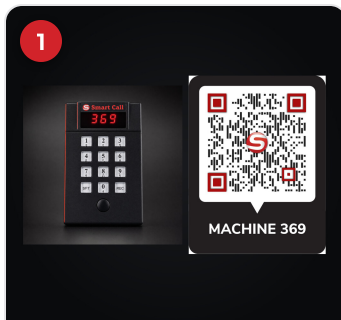

"Line 3 goes down at 2 a.m. **Nobody knows for 40 minutes.**"

LOST OUTPUT

OVERTIME TO CATCH UP

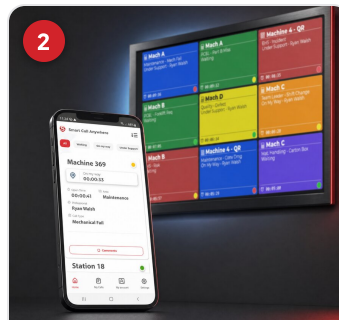

NO PROOF OF RESPONSE

HOW IT WORKS One tap or scan. The right tech. Every call logged. Offline RF or cloud — your choice

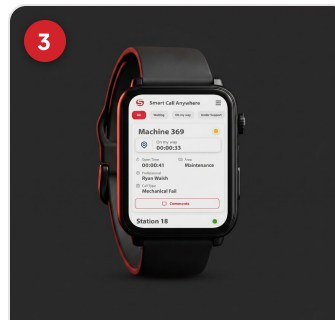

Trigger

The operator opens the call at the machine — tap the wireless keypad or scan the QR. No app, no Wi-Fi.

Route

The call reaches the right tech's phone and the floor board instantly — not a broadcast to everyone.

Acknowledge

They tap "On my way." Closed-loop: open → assigned → en route → resolved.

Measure

Bell Cloud turns every call into MTTR, MTBF and downtime trends — audit-ready by default.

ONE STACK

Smart Call (offline RF + Smart Call Anywhere cloud) for instant routing, plus **Bell Cloud** for the analytics. One claim: measurably faster response, measurably less downtime.

-50%

MACHINE DOWNTIME

Faurecia, a Tier-1 automotive supplier, deployed Smart Call + Bell Cloud on its production lines and cut machine downtime by **50%**. Nine months in, they expanded it to more plants.

Production teams stopped hallway-hunting for maintenance — and started seeing calls on their watches.

WHAT YOU GET Less downtime. And the data to prove it.

Up to 50% faster response

The call finds the nearest qualified tech in seconds — with an escalation ladder if no one acknowledges.

Audit-ready logs, automatically

Bell Cloud records every call by unit, shift and call type. Export the KPI deck before the ops review.

No rewiring. Plug-and-play.

Wireless RF works where IT can't run cable. Use offline RF or the cloud app — or both.

Priority routing kills alarm fatigue

Routine / Assist / Urgent tiers and role-based routing — only the right person gets the call.

RISK-FREE OFFER · U.S. MANUFACTURERS

Start your **FREE 30-day ANDON** pilot.

See it run on your own floor before you commit a dollar. No rewiring, no IT project, no risk — just proof. Here's exactly how it works:

STEP 1

Tell us about your line

STEP 2

We run a short demo

STEP 3

We set up the pilot on your floor

STEP 4

You measure the results
